                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | t News     Any attempt<br>to find new "parameters" for<br>production quotas would, how-<br>ever, reduce the entitlements of<br>the poorest member states. It<br>could only be partly relevant to<br>any final comptomise because<br>everyone wants a bigger pro-<br>portionate share and no one<br>will accept bes.<br>Surprisingly, the experts.<br>last effort to find oltjective<br>triteria for deciding quotas has<br>tended to strengthen the posi-<br>tion of Saudi Arabia and<br>Kuwait because of the impor-<br>tance of oil reserves, produc-<br>tion capacity and historiv<br>market share.<br>Yesterday evening as minis-<br>met once again to thrash out<br>the issue of quotas delegates<br>were still uncertain just how<br>far Saudi Arabia would go in<br>asserting its muscle. It is<br>generally assumed, however,<br>that the heavyweights would<br>not go so far as to revert to a<br>"price war" would rever<br>the issue of an as to revert to a<br>"price war" would not go an<br>ean afford.<br>This year's fall in prices cost<br>members \$50bn and cumula-<br>tively could mean a loss of<br>\$170bn in revenues between<br>1986 and 1990, according to a<br>recent study by two respected<br>Geneva-based consultants, Dr<br>Nordin Ait-Laoussine and Dr | LONDON<br>MARKETS<br>THE GOLD price came under<br>further pressure yesterday<br>with the London builton mar-<br>tet quotation adding \$6.25 to<br>Tuesday's \$2.25 decline at<br>\$422.25 a troy onnce. Dealers<br>said the bearish tone was<br>influenced by doubts that<br>agreement would be reached<br>on new quotas at the Opec<br>talks in Geneva. This would<br>open the way for lower oil<br>prices and hence lower<br>inflation, they explained. The<br>coffee market continued its<br>run of violent fluctuations<br>with a 560 rise to £2,222.50 a<br>tonne, exactly reversing<br>Tuesday's fall. Barlier the<br>market had dipped to 2-<br>month lows before the<br>speculators flocked back<br>encouraged by rumours that<br>Brazil had resumed buying.<br>Tuesday's setback had been<br>partly due to talk that the<br>trader believed to be buying<br>on behalf of Brazilian anthori-<br>ties had suddenly turned<br>from buying to selling. Bat<br>that trader was reported to<br>be an active buyer again<br>yesterday. Trading was excep-<br>tionally heavy with over<br>13,500 lots (3 tonnes each)<br>changing hands.<br>LAME prices supplied by<br>Amalgamated Metai Trading. | REUTERS           INDICES           056, 14052, 12507,8 1 1708,1           1592,9;1691,8 1 1507,8 1 1708,1           (Base: September 10 1931=100)           DOW JONES           Jones 14 13 200 200           Spot 192,06 192,477           Jones 14 13 200 200           Spot 192,06 192,477           Jones 14 13 200 200           Spot 192,06 192,477           (Base: December 31 1937=100)<br>METALS           NETALS           Auminium           Jones 200,5           Jones 200,5           Jones 200,5           Jones 200,5           Station 200,5           Station 200,5           Jones 200,5 | nervous consolidation late<br>huying, mostly short-covering<br>ahead of today's industrial<br>production figures, took levels<br>to a late test of the \$430 level<br>before the market settled at<br>\$428.7.<br>NEW YORK<br>ALUMINIUM 40,000 b, conta/b<br>Close High Low Prov<br>Oct 52.25 — 52.00<br>Dec 52.70 — 52.00<br>March 53.05 52.00 52.90 63.70<br>March 53.05 52.00 52.90 63.70<br>March 53.05 52.00 52.90 63.70<br>July 53.30 — 53.80<br>Dec 53.85 — 53.80<br>Dec 53.85 — 53.80<br>Jan 54.05 — 53.80<br>Dec 53.86 — 53.80<br>Jan 54.05 — 53.80 | Jan 112,00 113,00 112,10 112,10<br>May 113,20 113,00 112,26 112,10<br>July 113,25 113,40 112,26 112,10<br>Juny 113,25 113,40 113,24 112,10<br>May 113,25 113,40 113,24 112,10<br>May 114,25                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

to be more enective, and party because of the distress which low oil prices have caused to other Opec members. The Gulf Co-operation Coun-cil, consisting of Sandi Arabia and Kuwait with Qatar, the United Arab Emirates, Oman pointed out the difference of interests between those counand Bahrain, aims at the and Banrain, aims at the recovery by the beavyweight Arab producers of a share of Opec production more in line with the size of their oil reserves.

This concern is reinforcedand complicated—by the fact that members have given about \$30bn to Iraq to belp its war effort against Iran.

effort against Iran. In 1979, the year of Opec's peak output, Sandi Arabia and the UAE accounted for 56 per cent of collective output, includ-ing natural gas liquids, totalling 31.67m barrels e day. Last year their share had fallen to 45 per cent ef enly 17.3m barrels a day.

## South Pacific fish pact near steps up gold

#### purchase

purchases.

Japan

JAPAN HAS been buying large ameunts of gold egain in a secretiva operation which helps support the dollar and makes its record surplus in trade with the US look much lower, Tokyo dealers said yesterday, reports

by 26 per cent in 1986 to Z\$358m president of the Zimbabwe over sluggish world demand, (\$215m) mainly reflecting induced this higher leaf prices at the Harare suction sales which ended this week. The flue-cured crop increased 8 per cent in volume to 114m kilos while average leaf prices are up almost 17 per cent at \$13c a kg (188 US cents). After sdjusting for currency fluctuations, the average laat price reduction in the decision to 12 per cent higher this year. Tobacco is Zimbabwe's most important export, occounting for about 20 per cent effected to grow larger tobacco price outlook for 1987 of 15 per cent.

Confidence returns to the cotton market

#### BY RICHARD MOONEY

six months. Producers, most of whom need a price of 60 cents

or more to make a decent return, are not yet out of the woods, bot they will certainly be much relieved. Only two months sgo, they were watching the New York futures quotation languishing at a 12 ware low of languishing at a 12-year low of 32 cents.

Back in early September. when prices had rallied by shout 9 cents from the lows. sould 9 cents from the lows, traders saw it as a technical recovery and had little confidence in its being main-tained. Since then, though, there has been a profound change in the complexion of the market. the market.

The revival has been based largely on the misfortunes of growers in the US, which vies with the Soviet Union for second place in the world than to production league preducer progres (behind China). According to In it Cotton Outlook, the Liverpool- moreover

"The American crop has taken a bit of a beating," says Mr John Garner, Cotton Out-look's editor. "In Texas they've had one of the worst disasters ever." He blames this on bad planting condtions back in the spring and abnormally early frosts a few days ago.

Overall. Cotten Outlook forecasts a world crop in 1986/87 of 72.34m bales, against world consumption of 74m bales. Tha projected shortfall may be quite 40 modest, but the prospect of any shortfall at all has been enough to breathe new life into a mar-ket which had been bracing itself

fer a further sodition to stocks, which already exceeded 50 per cent ef annual demand. And Mr Garner says the expected deficit is toore likely to widen of shipping more than 2.6m than to narrow as the season

CONFIDENCE is cantiously based newsletter, edverse inclined to take a less alarmist Because prices are rising, pro-market after the depths to push US output down to 9.75m Some traders bave been argu-which prices plumbed during bales in the 1986-87 season, ing that the situation was not the summer. In early October, the world price rose above 50 cents a ib price rose above 50 cents a ib six months. Producers, most of must still regard as "bargain" prices, especially when they compare them with the 90 cents a pound they were having to pay

two-and a-half years ago. One important question mark still hangs over the cotton market, however, and that con-COTTON lit Casto per Is. all X.Europe OUTLOOK cerus US export policy. A low INDEX 'X' (SM 1-1/16) domestic crop and a rise in domestic consumption (forecast at 6.8m bales for 1986-87 com-pared with 6.49m in 1985-86) 1986 the continuing incursions of cheap foreign competition. So

the cotton trade will be watch bales in any one marketing ing closely to see how the US year. This view now seems to Administration walks the tight-be more widaly accepted. rope between maximising prices be more widaly accepted. The net result of all this is than to narrow as the season The net result of all this is (encouraging for its com-progresses in its more buoyant mood, not yet a "sellers' market," is sively for market share (raising moreover, tha market has been not so obviously e buyers' one. its own subsidy bill).

## FINANCIAL FUTURES Firmer tone for gilts

STERLING INTEREST rate con-tracts were steady to firm on the London International Financial Future Exchange resteridy. The stronger close of long glit futures reflected short covaring ahead of tonight's speech at the Lord Mayor's hanquet at the Mansion House by Mr Nigel Lawson, Chan-cellor of the Exchanger. The mar-ket hoped the Chancellor will pro-vide answers to recent criticism, and closing of 110-27, before recovering with the answers to recent criticism, and closing of 110-27, compared with 110-05 previously. Three-month starling deposits suggested that 16 the market is not happy with the Chancellor will show this the Contract for the Exchangelor ing the contract down to around ing the contract down to around tor. This would also indicate that base rates is not enough to caim

## **MONEY MARKETS** UK rates steadier

INTEREST RATES were fairly steady on the London money mar-ket yesterday, as the Bank if Eng-land adjusted its market dealing rates to come into line with bank base rates of 11 per cent. Three-month interbank was quoted at 114-114 per cent at the close, compared with 114-114 per cent on Tuesday, as dealers waited oervously for tonight's speech hy Mr Nigel Lawson, the Chancellor, at the Mansion House. The market was faced with a very large credit shortage, at e time when discount houses are intermediated at 10% per cent; 220 Treasury bills in band 1 at 10% per cent; 210 Jan 22 at 101 bills in band 2 at 104 per cent, and 257 m bank bills in band 4 et 101 per cent; 200 bills in band 1 at 10% per cent; 210 bills in band 1 at 10% per cent; 210 band 2 at 104 per cent; 210 band 2 a

## UK clearing bank base lending rate 11 per cent since October 15

running small books, end deciets running small books, and declets suggested some technical man-ocuvring took place in the after-noon between the banks and the houses to enable the Bank of Eng-

houses to enable the Bank of Eng-land to buy enough bills to take out the abortage. The Bank of England forecast a money market shortage of f950m initially, but revised this to £1,000m at nooo and to f900m in the afternoon. Total assistance of £807m was provided. An early round of help was

£307m was provided. An early round of heip was given, when the anthorities bought £177m hills by way nf £1m banks bills in hand 1 at 10% per cent; £6m bank bills in band 2 at 10% per ceot; £49m bank bills in band 3 at 10% per cent; and £121m band 3 at 10% per cent; and £121m bank bills in band 4 at 1011 per

bills in band 1 at 10% per cent; again years bills in band 1 at 10% per cent; 2554m bank bills in band 2 at 1919 per cent; 221m bank bills in band S at 10% per cent; and £11m bank hills in band 4 at 1011 per cent. Late assistance of around £40m was also provided. Bills maturing in official bands, repayment of late assistance and e take-up of Treasury bills drained £337m, with Exchequer transac-tinns absorbing £440m; a rise in the note circulation £100m; and bank balances below target £80m. In Frankfurt call money rose to 440 per cent from 4.15 per cent, with hids seen as high as 4.50 per ceot, as liquidity drained from the moocy market. The Bundesbapk allocated only DM 5.20n at Tues-day's securities repurchase agree-

day's securities repurchase agree ment tender, compared with an

mean tender, compared with an expiring agreement of DM 12bn, In Tekyo call (unconditional) mnocy was unchanged at 4.28125 per cent, hot is likely to fall today because of a money market sur-plus, estimated at around Y150bn (SSSOm). Conditions were sight yesterday, reflecting a credit shor-taga of ¥300hn,

Wednesday October 15 1986

Suppre particular of a couple of pence to 180p. Stores put on a resillent performance. Marks and Spencer rallied 5 to 197p, and Burton, still benefiting from its innovative cash-raising proposals, added 6 to 280p. Diracs with a few parce to

ero interests, the shares drifted a couple of pence lower to 775p. The clearers edged forward on further consideration of the base rate increases. Natwest added 4 at 518p and Barcleys firmed 3 at Reyals, 10 better at 812p, led a modest rally by Composites. General Accident improved 8 at

827p as did GRE at 807p. Elsewhere, Abbey Life cheapened a few pence at 188p following the interim statement, but vague rumours of a possible bid from the TSB left London and Manchester 4 bidhor at 2000

TSB moved up to 851/2p as pjersis-tent small selling abated, but the

But steadipess in the pound

Light selling took Government upgrading. BPB industries im-proved 6 to451p and Redland har-dened a couple of pence to 380p. Elsewhere, Heywood Williams moved up 8 to 184p as institutional aupport reived and John Finlan improved 8 to 74p in a restricted market. Meyer International con-tinued to attract buyers in the wake of a broker's lunch and

## wake of a hroker's lunch and added 4 more to 233p, hut Gibbs and Dandy A, a firm market of late reflecting newsletter comment, softened a couple of pence to 61p following profit-taking. Watts Blake Bearne gained 8 to 184p in sympathy with English China Clays. Freemans volatile Freemans, the South London-based meil-order house proved to be one of the session's more vola-

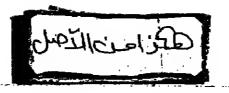

bigher at 200p.

Interest in the Building sector

## FINANCIAL TIMES WORLD STOCK MARKETS

#### WALL STREET

## **Bonds share** in strong late rally

A SURGE of buying in the last hour of trading yesterday gave Wall Street stock markets their best day since their steep two-day sell-off a month ago, writes Roderick Oram in New York.

Bond markets rallied in similar fashion, recovering from losses earlier in the day which had been prompted by a re-cord monthly rise in US retail sales.

The Dow Jones industrial average closed up 31.49 at 1831.69, the best oneday gain since it rose 38.38 points to its record high of 1,919.71 on September 4. Broad market indices showed similar gains with the New York Stock Exchange composite index rising 1.61 points to 137.36.

The markets had managed only modest gains before the fast-paced last hour. est gains before the last-pacet last notif. Once the Dow had broken through a re-sistance level around 1,810.20, the rise accelerated, fuelled by share buying pro-grammes triggered by premiums on stock index options. Total volume remained only moderate, however, with 145m shares changing hands on the NYSE. Rising issues outpaced falling by 1,165 to 430.

**KEY MARKET MONITORS** 

managed finally to break its previous re-cord of 830.84 set in March to close up 8.50 on the day at 838.13.

Among blue-chips, Du Pont rose \$% to \$80%, McDonald's gained \$% to \$60%, General Motors was ahead \$% to \$87%, Sears put on \$1% to \$43% and Exxon improved \$% to \$67.

IBM gained \$2% to \$123, reversing a week-long decline in its shares because of poor third-quarter results. Other computer makers showed gains with Honeywell up \$1% to \$68% and Digital Equipment ahead \$1% to \$92%, Burroughs was up \$% at \$89% although Apple was down \$% to \$33% despite reporting sharply

higher profits on Tuesday. Xerox, up \$1% to \$56, announced an early retirement offer for 4,000 of its 60,000 employees.

Good results from a number of drug companies boosted share prices in the sector. Shering-Piough rose \$2% to \$79% and Upjohn gained \$2% to \$94.

and Upiohn gained \$2% to \$94. Food companies were another strong group with Quaker Oats ahead by \$2% to \$77%, General Mills up \$3 to \$81%, Campbell Soup rising \$1% to \$62% and Pillsbury gaining \$1 to \$72. Time Inc. fell \$3 to \$70% after it re-ported that large third-quarter profits consisted almost entirely of gains from sale of assets while operating profits fell

sale of assets while operating profits fell sharply.

Manufacturers Hanover edged up \$% to \$45% after reporting a 9 per cent in-crease in quarterly profits. Continental Illinois was unchanged at \$7% despite a 15 per cent rise in third-quarter profits. Allied Bancshares fell \$% to \$15% after reporting a quarterly loss of \$1.12 a share against net profit of 73 cents a

#### share a year earlier. Bank of New York gained \$% to \$58% after reporting a rise in earnings to \$1.66 a share from \$1.45. Campeau, the Canadian property group, extended again the deadline for its offer for Allied Stores whose shares were unchanged at \$66%.

E. F. Hutton continued its recent sharp rise, adding a further \$1% to \$48% yesterday to a high for the year. The securities firm is widely remoured to be a takeover target

Amerada Hess, up \$1% to \$26%, was the most active issue with 4.03m shares traded. Mesa, whose chief executive is Mr T. Boone Pickens, the corporate raider, said it had no comment on speculation it was buying Amerada Hess shares.

The main news in the credit markets was the record 4.6 per cent rise in retail sales in September from a month earlier. Although this was higher than most estimates, all but 0.1 percentage point of the gain was attributable to surging car and light truck sales stimulated by lowcost financing offers.

The markets seemed unsure of how to interpret the statistics, which were not considered a reliable guide to the retail sales trend. Futures contracts were marked down sharply while prices in the cash market fell, before recovering again.

The price of the benchmark 725 per cent Treasury bond due 2016 rose % of a point to 94.05 yielding 7.75 per cent. Prices rose for all except the shortest maturities.

The three-month Treasury bill yield rose 5 basis points to 5.16 per cent, sixmonth bills yield rose 6 basis points to 5.26 per cent and year bills were up 3 basis points at 5.37 per cent. The Federal Reserve made \$1.5bn of

customer repurchases when the Fed funds rate was 5% per cent at which level it closed.

## EUROPE Nervousness over dollar persists

NERVOUSNESS over foreign exchange rates continued to hang heavily in Eu-rope where most bourses ended lower or mixed, lacking any clear or fresh direction

Frankfurt turned down after a brief rally on Tuesday and the Commerzbank index dipped 7.4 to 1,989.4 despite funda-

mentally positive economic data. Profit taking hit Deutsche Bank, era-sing its gains of the previous session and leaving it down DM 11.50 at DM 769. Car issues were also hard hit among the sharply lower blue chips.

Porsche, the high-priced sports car producer which is a major dollar earner from its exports, tumbled DM 42 to DM 959, while VW lost DM 7.80 to DM477.20 after adding DM 13.50 on Tuesday.

## TOKYO Steep fall as institutions withdraw

A SPATE OF small-lot selling pushed Tokyo lower yesterday, sending the Nik-kei average down in its fourth biggest

Nishiwaki of Hij Press. The index shed 347.95 points from the previous day to 16,970.12, falling below 17,000 for the first time in about four months. Volume totalled 371,39m shares compared with Tuesday's 359.19m. Losers led gainers by 533 to 238, with 158 issues unchanged.

Nippon Kokan, Ishikawajima-Harima Heavy Industries and other large-capital stocks, which had led the bullish market since the summer, declined sharply.

Investors were concerned about the direction of the market, which had been performing well on the strength of "tri-ple merit stocks" - those benefiting from the strong yen, lower interest rates and cheaper crude oil.

The main factor behind the recent downturn is the withdrawal of institutional investors, who had been pouring large sums into the market.

One investment trust company placed buy orders for some blue chips, but this did nothing to buoy the market.

Nippon Steel topped the active list with 24.72m shares, but closed Y3 lower at Y196. Kawasaki Steel fell Y15 to Y192, Tokyo Gas Y40 to Y1,020 and Tokyo Electric Power Y200 to Y7,450.

Ishikawajima Harima Heavy Indus-tries lost Y42 to Y508, although it was the second busiest issue with 19.36m shares changing hands.

Teijin attracted strong buying interest and rose Y15 to Y470, supported by Dai-wa Securities Company's buying. It was the third most active stock with 15.74m shares traded. Reports that Teijin will soon start clinical trials on an anti-cancer drug also contributed.

Nippon Kokan, fourth with 15.54m shares, dropped Y32 to Y250, Toshiba Y48 to Y857 and Taisei Corp Y72 to Y836. Medium and small-capital blue-chips, which were sought by investment trusts the previous day, turned lower, with Canon losing Y40 to Y1,020, Kirin Brew-ery Y60 to Y1,350, and Anritsu Electric Y110 to Y3,370.

Hitachi and Mitsubishi Electric continued to ease, ending at Y1,040 and

. . . . .

Y468, down Y30 and Y12, respectively. Bond prices were lower, hit by the sharp overnight drop in bond prices in 2308 Hong Kong 2200 New York and the slump on the Tokyo Hang Seng July 31, 1964-100 stock market. The yield on the benchmark 6.2 per 2100

cent government bond, due in July 1995, ended at 4.800 per cent, up from Tuesday's 4.780 per cent. On the over-the-counter market, the

yield on the benchmark issue rose to 4.820 per cent from 4.770 per cent the previous day.

There are strong expectations that the Bank of Japan will buy bonds to prop up the market, but it took no action yesterday.

#### LONDON

THE SCHEDULED speech tonight by the Chancellor of the Exchequer brought a measure of poise back to London, where the FT Ordinary index rose 14.1 to close at 1.276.4 and the more broadly based FT-SE index gained 15.0 to 1,607.0.

Equities were led forward by support for ICI and Glazo Holdings while government bonds rallied from some early selling to edge higher at the close.

Both markets opened nervously against a background of firmer money market rates and suggestions that a further one point rise in base rates could not long be delayed.

Chief price changes, Page 39; Details, Page 38; Share information service, Pages 36, 37.

#### SINGAPORE

INCREASED BUYING and short covering helped prices close higher over a broad front in fairly active Singapore trading and the Straits Times industrial index rose 10.84 to 893.66.

The price rises were attributed to bargain bunters who moved in for blue-chip and trustee stocks, after a morning session that was slow but slightly higher than the previous one.

Sime Darby put on 3 cents to S\$1.83 while Singapore Airlines rose 20 cents to S\$9.4 and UOB added 10 cents to S\$4.78.

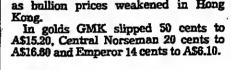

#### SOUTH AFRICA

CONTINUED WEAKNESS in the bollion price saw shares end sharply lower in thin Johannesburg trading. Randfontein fell R13 to R445, Groot-

viei R1.75 to R16.50 and Zandpan 25 cents to R3.70. Most other minings and mining financials also eased.

Gencor fell R2 to R60.50 and De Beers 25 cents to R34.75. In platinums, Rusten-burg dipped R1.50 to R49.50. Industrials ware comparatively

steady.

slide lower as golds, oils and utilities

was steady at CS16%. Oils continued lowprices but the metals and mines index was little changed.

Montreal was also lower.

a **HONG KONG** HEAVY OVERSEAS DEMAND pushed Hong Kong's Hang Seng index 40.42 ahead to a record 2,289.85, as foreign funds flowed abundantly into the mar-10**Г** Hong Kong Land dropped HK\$1.80 to HK\$6.55. Separately, Bond Corporation, whose chairman Alan Bond is due to vis-

Retailers bucked the trend, however at the start of the Christmas shopping period and as the Bundesbank reported a growth in domestic consumption on the basis of rising disposable income. Kaufhof continued to gain, adding DM

4 to DM 530 on higher nine-month sales and Karstadt rose DM 1.50 to DM 465.50. Bonds dropped sharply, undermined by a steep rise in US retail sales figures and the barely changed dollar. Longs fell by up to 50 basis points, but there were also scattered gains of around 5 basis points. The Bundesbank sold DM 1.3m worth

of domestic paper after buying DM 4.4m on Tuesday.

Paris turned softer on concern over the outlook for interest rates and a series of disappointing French economic indicators. Consumer prices rose 0.4 per cent and the trade account moved to an adjusted FFr 2.9bn deficit in September from an August surplus of FFr 3.2bn.

Michelin led car shares downward with a drop of FFr 135 to FFr 2,355 while Peugeot shed FFr 30 to FFr 1,100 and Valeo, the car parts group, lost FFr 5 to FFr 503.

The French Government's privatisation of Saint Gobain, the state owned glass and building materials group, has been tentatively scheduled to open on

November 24. Oslo showed a marked drop in prices and Stockholm ended down as rumours surfaced that the Government was planning to tighten the tax on share gains. Madrid eased marginally although construction issues resisted the trend.

Banco Central, was up 28 points at 918 per cent of its nominal value after gain-ing 20 points in Tuesday's session on news that Kuwaiti investors had bought a stake in the bank.

Amsterdam was busy with investors squaring their positions on the European Option Exchange before the expiry of October share options on Friday. Most prices ended lower, however, on interest rate and dollar factors.

Royal Dutch was the only stock to see some foreign demand and firmed 90 cents to Fl 199.20. The group is setting up a co-ordinated campaign of opposition to the apartheid regime in South Africa

Brussels closed mixed as the political crisis remained unsolved. Some holding companies firmed, utilities were stable while industrials were mixed.

Milan ended mixed in a session of monthly settlements marked by active trading. Leading insurers ended higher while industrials were mixed and banks and financial issues showed losses. Zurich steadied amid continuing uncertainty over the dollar.

## Italy and the International Economy

### ROME, 10 & 11 November 1986

This will be the fourth European Business Forum that the Financial Times has held in Rome. The agenda covers the economic outlook for Italy as well as a number of important European and Atlantic business issues. Speakers taking part include:

## ...Giovanni Agneiii.... Marlsa Bellisario.....

.... Carlo De Benedetti .... Guido Carli .... Edith Cresson ......

....Romeo dalla Chlesa....Ralf Dahrendorf .....

.... Giovanni Franzi.... Denis Healey.... Musa Hitam......

....Roger Hornett....The Lord Roll of Ipsden.....

... CJ van der Klugt ... Walter Mondale... Mario Monti...

## ... Romano Prodi.... Rodolfo Rinaidi.... Mario Sarcineiii.....

# Information Technology in Finance

## **Expectations** are now more realistic

By ALAN CANE

THE WORLD'S major finan-eial institutions have reached the third-and final-phase in their struggle to exploit fully electronic technol-ogy. The first phase, driven chiefly by the technologists, was characterised by the perception that automatinn could offer sub-stantial cost benefits through the computerisation of the "back office," the accounting and clearing functiona.

Senior management in the banks and other financial institutions were easily per-suaded to invest in substantial data processing capability. The benefits, after all, were easy to quantify. But it was all done without much thought for the forture, and the way the banks. future, and the way the banks, and others, set up their compu-ter files now represents a serious barrier to their hopes of using all that computerised information for commercial advantage.

During phase two, which began in the mid-1970s, those same managers began to develop an awareness of the develop an awareness of the considerations and more by potential nf computer-based systems to support new pro-ducts and services which could not only help to keep costs questioning of the direction in down-especially staff costs-bat would prove attractive to new and existing customers. This was the era when notions on its technical experts and

THE WORLD'S major finan- such as electronic funds trans fer, cashless shopping and home banking first came into vogue The world's first inter-bank messaging system, SWIFT, came into being. In the US, a myriad experiments in electronic funds transfer at the point-of-sale were initiated, to be followed by similar trials in Europe and the Far Last

Simple cash dispensers oper-ated by slotted cards were quickly superseded by auto-mated teller machines (ATMs, mated teller machines (ATMs, the first banking robots) and plans for substantial networks of shared ATMs were laid and in many cases, implemented. Elec-tronic banking became a reality. With phase three, however, a new sense of cantion and perhaps even disillusinnment has set in. Bankers are no less seized of the importance of technology to their business but now they have a better under-

now they have a better under-standing of the frequently pro-found implications of what they are about. applies its own judgement to the critical questions. So, for example, although They are less likely to be impressed by purely technical considerations and more by commercial, political and finanbanking information networks continue to develop in size, power and sophistication, there is widespread concern about the security and integrity of all that data travelling around the world at the speed of light.

Electronic systems have transformed the financial world, but with the benefit of experience, the top level of financial management is looking in hard business terms at the implications of implementing this well-tried technology.

The banks are still anxious to find an end to the expensive, wasteful and time-consuming business of clearing paper che-

ques, but they have become alert to the fact that electronic funds transfer at the pointof-alert to the fact that electronic funds transfer at the pointof-and they are increasingly conscious of the fragility of the systems to which they entrust so much of their business. Up to now, they have placed their failts in "hot-standby" arrange ments (twin computers running identical software so that if one failts the other can take over), or

Senior managers in the bank-ing and finance industries, indeed, seem yet to be con-vinced that their computer

## before it's too late

For some years now our strategy when designing systems has been quite different from everyone else.

Other manufacturers have stuck doggedy to their own individual system often rigidly governed by their mainframe, leading users down a road on which it may be difficult to turn back. Our approach has always been one of integration and flexibility which now takes full advantage. of PC based technology and allows the customer freedom of choice.

#### Systems Integration

Faced with an increasing rate of change, mergers and market demands, financial organisations must have absolute flexibility to adapt and develop their information technology systems.

#### Olivetti meets that demand.

With our business partner AT&T we have produced a series of building blocks which allow almost any combination of equipment, at all levels, to work together with total compatability. Our commitment to UNIX\* and-MS-DOS standards is just one example of this.

#### Unique PC-based technology

As well as following a strategy of compatability, all our new products are PC based yet still ergonomically designed for the task in hand. (It's no accident being Europe's largest manufacturer of PC's).

It is far quicker and more flexible to incorporate intelligence at the workstation, to programme in new products and ideas here, than to overload a central brain. with all the disruption and delay that brings.

#### Large branch network experience

Banks and building societies among others with a wide network of branches have been particular beneficiaries of Olivetti's way of thinking. There are over a quarter of a million Olivetti financial terminals in use, more than any other European manufacturer.

#### New developments

Because of our aggressive R&D strategy we've always been at the forefront of technology. Now we're leading with

the integration of voice, image and data through our association with AT&T.

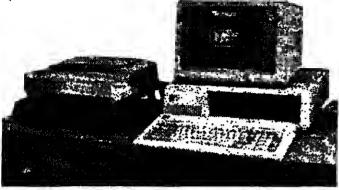

For more information about Olivetti's Systems Integration, send off the coupon or call 01-377 8644 and ask for Lance Allen .

## Systems are streamlined to woo treasurers

" DESK TOP real estate " is how one banker describes the current state of cash management on the corporate user's desk-a hotch potch of different systems from each of the several banks with which the company holds accounts. Much in the way that dealers' desks in City trading rooms have cleared to hold only one or two screens, so cash man-agement systems are becoming, through necessity, more stream-lined and tuned-in to what the corporate treasurer is actually asking for.

Encouraging professionalism: an IBM workstation as part of an electronic cash management system.

Treasurers in the UK have address the requirements of the aken to cash management pro- UK treasurer. There is no doubt taken to cash management pro-ducts with a good deal less enthusiasm than their US peers, largely because their need was less immediate—Britain enjors that they were getting it badly wrong. Vargoss-Glendinning found in their recent survey of corporate banking in the UK that despite doubling their less immediate—Britan enjoys a highly efficient clearing sys-tem, giving value for payments within three days, and that, sup-ported by the extensive branch networks of the major UK banks, made many of the fea-tures of US systems redundant. But US suppliers of cash man-agement systems, along with efforts to sell cash management

efforts to sell cash management systems last year, banks only succeeded in increasing the take up rate by 1 per cent. To simply transport systems, developed for the US market, into Europe and to expect them to be received with open arms reflected e naivety that has since been replaced by a clear-sighted marketing strategy. What the treasurer wants, it appears, is a modular system which allows him to integrate the various sources of informaagement systems, along with British banks, are now trying to

the various sources of informa-tion about his accounts, in realtion about his accounts, in real-time, with a good deal more detail aboot transactions than is presently supplied. Treasurers in the US have forced banks to co-operate over reporting balances into each other's systems, despite protests that this expressed them to the

data on accounts into a common format. The concentrator bank-the one collecting all the data-never actually sees what is in the other banks' accounts. No bank would now expect to the second the second to the seco other's systems, despite protests bank—the one collecting all the that this exposed them to the data—never actually sees what competition. European banks is in the other banks' accounts. still tend to use the excuse of No bank would now expect to confidentiality, although the offer a "dumb" system which more likely reason is that they simply collected balances and want to profit from the interest reported them, although on any idle funds themselves.

CASH MANAGEMENT

Corporate treasurers in Britain, blessed with a highly efficient clearing bank system, have taken less readily than their American counterparts to cash management products. The banks are tackling the market, however, with a new range of sophisticated services.

ages in the form of Forex Mana-through its Midland Advisory ger, a foreign exchange expo-sure management, and Cashflow Finally, Lloyds offers Cash-Matager, which collects call which has funds transfer account details into different and daily updates on balances, formate formats.

The National Westminster Bank began by offering a data for 60 days. Geisco-supported product, Net-work, which was developed with NDC, and offered the standard NDC, and offered the standard forward foreign exchange, ster-balance and transaction repor-ling deposit rates and projec-tions on exchange rates, and a a money transfer service, and a money transfer service for foreign exchange and interest foreign exchange and interest rates

Note in terming and interest rates. More recently, however, it has been offering NETS, or Net-works for Electronic Transac-tion Services, another NDC pro-duct, which has the advantage of allowing free formatting, intra-day reporting and treasury workstation. The Midland is beginning to move towards a real-time sys-tem both internationally and domestically, which will be a significant progression as most UK systems only offer update on balances on a day, typically at close of basines. The Midland system, CMS, provides balance and transac-

The Midland system, CMS, provides balance and transac-tion reporting, uncleared items, target balances, a cash flow forecasting model and frui-tilateral netting and funds transfer. The Midland also offers software for exposure management and a foreign exchange reporting service

including forecasts, summaries, target balances and historical

There is no doubt that the UK banks were following their more aggressive US rivals into the cash management field, and to some extent the US banks are still leading the way in development of systems.

ment of systems. Most of their product develop-ment for the European market is now carried out in Europe, and they are trying to anticipate the direction of requirements. Most observers would agree that integration is a key issue, and the ability to interface with computerised treasury func-tions is also a head start. Citi-bank is currently working with software house Comintel, which has a highly successful treasury has a highly successful treasury management product. Citibank sims to enable transactions

aims to enable transactions from the treasury computer sys-tem to be accepted into the bank's mainframe and in turn to allow input into the customer's system. Chase Manhattan is developprovide

Chase Manhattan is develop-ing its Global MicroStation to include multi-user local area network based systems. Pro-ducts which can be used on Unix based hardware, multi-tas-king single systems and pro-ducts aimed at the middle mar-ket corporations are also underway. Chemical Bank, too, is con-tinuing to add to its highly successful ChemiLink system, recently launching the micro-based ChemiLink Flus, which allows the user to retrieve account information automa-tically, and to consolidate the data in a spreadsheet package without manaal intervention. Mowever, perhaps more

However, perhaps more interesting than the actual prointeresting than the actual pro-ducts themselves is the change in marketing strategy that is emerging. The reason that the banks were misfiring with the products was that they were not communicating with the customers, and this was reflected particularly in the pricing strategy they employed. Typically, UK banks have pre-sented their corporate custom-ers with a quarterly unbundled bill for all services during that

.

any delighted. His new and very sophisti-cated dealing room had passed its first big test—tha London Stock Exchange gilts dress rehearsal for Big Bang—with flying colnurs. Some difficulties had been idealified had been identified and steps were being taken to remedy them, but overall he was satis-fied the company was in good shape to survive in the world of

electronic dealing. He was relieved that the com-pany's initial decision, in build a basic system which carried out all the essential functions of trading but in which back office and front office were completely integrated, had been vindicated.

Others may not find them-selves in such a fortunate posiselves in such a fortunate posi-tion. Computer-based dealing rooms are expensive, subject to the whims nf fashinn and are often obsolete as soon as they are completed, but they nevertheless build the key to successful trading in today's geographically distributed markets. geographically markets

Alexanders' room repre-ented tha best of collaboration between three separate companies.

The physical structure of the room was the work of Chester Jones, the electronics were designed by C and P Technnlogy and the systems work was carried out by Admiral Computing, a small UK company, based in

Camberley, Snrrey. Each dealer faces four full-colour screens on the desk and a further two, mounted nn a gan-try above the dealing position. The elevated screens ensure line of sight between dealers while they are trading. The psychology of trading rooms is still a grey area, but dealers like to keep visual tabs in each

other. One of the snags that Alexanders' discovered during the gilts rehearsal was that dealers had difficulty shouting to each other across the room "Squawk boxes " have now been installed to alleviate tha problem.

The displays on the screens are controlled by a box of col-oured switches, a speciality of C and P, which make it possible to call up any one of e variety of and P, which make in possible to "Dealers need colour to dis-call up any one of e variety of play market data that much information services-Renters, more intelligently. Without col-Telerate and so on. nur, you simply 'blind' the The traders still make ont dealer with information. Some

#### AUTOMATED DEALING ROOMS

The dealing room has overtaken the data centre as the financial services company's technological showpiece, as Alan Cane reports.

dealing tickets but the data is pnt into the system by data-entry clerks using specially devised electronic data-entry forms.

Reports to the Central Gilts Office are carried out separ-ately using a personal computer and the Stock Exchange Integrated Data Network, a City-broad communications conduit. It is expected that this part of the process will be automated next year.

Alexanders and Admiral emphasize the importance of the integration of the front and beck office.

Research carried nut in the US by Ms Caroline Frost of the managemant consultancy, Nolan and Norton, shows that Nolan and Norton, shows that many of the big US financial conglomerates found them-selves in tronble after Wall Street's nwn Big Bang in the 1970s because front affice (trad-ing) and back affice (settlement)

systems were built separately. "The trading systems simply did not match the settlement systems," Ms Frost palats out -Colnur screens are quickly becoming indispensable tonls of

the trade, Mr Michael Roden, bead nf operations for Midland Bank Group Treasury which installed a 128-positinn room earlier in the year, now says he completely underestimated how

colour screens there. "Dealers need colour to dis-

of nor screens are very complex and it is difficult to quickly pick nut the cure information which is essential to trading."

The trend today is towards larger rooms with every kind of trader in their separate areas on the floor. While 400 or so positions is big for London, 1,000 positions is now within sight in New York. sight in New York.

Mr Roden believes there is a positive synergy beynnd a cer-tain size — "Typically fareign exchange dealers and secondary market dealers, for example, would keep to themselves," he says. "Now there is a better

understanding of what every-body else is doing and a better level nf cross-fertilisation nf ideas." Midland has been a pinneer in the use of artificial intelli-gence techniques to aid dealers.

Understandably, it is reinc-Understandably, it is reinc-tant to discuss exactly what it is doing — "this is tha real com-petitive edge" — says Mr Roden, but it has programs running on personal computers to manage currency options and Interest

rate swaps, as well as general risk management. It. is not expensive in capital, says Mr Rodan, but it is difficult to prise out of the dealers exactly the kind of knowledge needed to build into the system to make it

useful dealing. The bank is building a in some dealing rooms, with so new and bigger computer com-plex and all nsers will have involved; Midland solves the new and bigger computer com-plex and all nsers will have

problem however, by locking them all away on the other side of the switching mechanisms which are used to display information on the dealers' screens.

The major change expected in dealing rooms over the next few years is the move from video switching technology to digital switching. Most information services-Reuters, Telerate and so on-are delivered as a video-feed, a form of television broad-cast which is relatively cheap and robust but inflexible. It can also become expensiva as the number of information services nuired to be supplied to each dealer desk multiplies. The best answer is the supply

in computer language. This can be easily switched to each dealer desk, as required. Furth-ermnre, tha data can be abstracted from the data feed by a company's in-hansa computer and manipulated to provide individual dealers with campo-site pages, tailored to their own requirements.

Big is not always beautiful in dealing rooms, howaver. One nf tha newest and mnst powerful dealing rooms in London boasts only 10 dealing positions. It is, however, the first gilts dealing room established in the Bank of England.

The Bank bas had a foreign exchange dealing room with fairly "Inw" technology, for some time, but traditionally the role of the Government Broker BABT approval in gilta dealings fell to a single

in gilts desine firm, Mullens. With the nnset nf Big Bang. £400,000 has been Mullens became part nf Williams, Cook, Loti and Kis-Warburg Ackroyd Rowe Pitman Mullens, owned by Mercury Sacurities. Mullens, owned by Mercury Massachusetts-based aing systems in preparation for the City's "Big Bang."

The Bang has thereinre had to build its nwn dealing room so that it can trade for liself. Designed by Robert Waever, with the electronics installed by C+P Technology, the room is perfectly geared to the collec-tion of information for tion of information monitoring and control for

#### DIRECTLINK

Chemical Bank's ChemLink® system has provided state-of-the-art treasury management services for over 12 years. ChemLink continues to make history by offering the systems of tomorrow today.

DirectLink consolidates bank data from multiple sources. A single S.W.L.F.T. formatted file is delivered high speed to your mainframe, mini or microcomputer. The

common S.W.I.F.T. format allows simple integration of multiple bank data into a variety of treasury systems.

Your system consistently attains maximum technical efficiency, saving time and cost.

DirectLink helps you make history.

## CHEMLINKPLUS

ChemLink Plus is a bridge between your banks and your spreadsheets.

ChemLink Plus software makes your personal computer a powerful tool for simple and effective daily cash management.

ChemLink Plus will automatically dial Chemical Bank's ChemLink system and other providers of your account information.

The system converts the information to feed any spreadsheet without manual rekeying.

With one-disk efficiency time-consuming and error-prone manual tasks are totally eliminated.

ChemLink Plus helps you make history.

## Slow start for armchair banking

BANKING from home has yet to prove itself the success many people thought it would be Castomers were expected to use their personal computers to calculate family accounts and then use the same terminal to contact their bank and transact all their business

IV\*

Not surprisingly, this service was always more attractive to business users than private stomers. But the big surprise has been how poorly received screen banking has been so far. The only country to bave a major screen-based system has been France, and there the gov-ernment supplied over 2,500,000 free videotex terminals (called Minitels) to telephone subscribers.

In other countries, success has come from voice response systems where transactions are made over the telephone.

made over the telephone. In the UK, home and small business banking was hersided as the second stage of the tech-nological revolution in hanking after automated teller machines (ATMs). However, none of the Big Four clearing banks has yet followed the lead of the Bank of Scotland and the Nottingham Building Society which laun-ched Prestel-based services in 1983.

The problem with Bank of Scotland's Home and Office Banking Service (HOBS) and Nottingham's Homelink is pre-cisely that they operate through Prestel.

HOME AND SMALL BUSINESS BANKING SYSTEMS

The concept of banking from home has been transformed into a cash management service for the smaller business.

of the business's accounts, rather than the overall stated balance, and enables the user to transfer funds between bers they have, but the figures are unlikely to be above the low About a quarter of HOBS sub-scribers are small businesses (although it would be tempting accounts to gain the maximum

interest. This facility costs an extra £5 a month, making a total cost of £192 a year for husiness users (including Prestel subscrip-tion). for a one person husiness to register as a private customer, because it is cheaper, but Homelink has hardly any busi-

The two services are quite similar since the Bank of Scot-land provides clearing services for Homelink. They can be used through a personal computer, or a conventional television nsing a keyboard that can be bought with the systems at a reduced

plans to extend it. The next step for home bank-ing will be the launch of a voice response system, similar to the 200,000 user phone-based sys-tem at Banco de Santander in Spain. The manufacturer of the Banco de Santander system, the Swiss company Antophon, says that one of the clearing banks will be launching such a system at the end of this year, but will pot say which one. National Westminster says it has no plans to launch such a system in the near future. aimilarly Midland and Barclays admit no plans, and the most likely candidate is Lloyds wbo already operate a limited Banco de Santander's voice Banco de Santander's voice Banco de Santander system in the near future. Banco de Santander's voice Banco de Santander's v

Banco de Santander's voice response service is the largest in the world, although there are over 5m users of similar systems worldwide, many in the US where the first phone-based sys-tem was introduced in 1976, four years before the first screen-

years before the first screen-based system. The Banco de Santander sys-tem is simple to nse. The customer dials through to any one of the 400 service lines (there would be less but long distance calls in Spain can be troublesome). A voice responds asking the customer to enter his account number which he does by punching the telephone keys by punching the telephone keys, et which point the voice asks for the identification number, and

when that is punched in the services available can be

accessed. The only problem is that peo-ple who do not have push-hntion telephones have to buy a special keypad, hnt this is much less expensive than a computer keyboard for a screen-based

system. In the US, a phone-based stock dealing service is availabe in most states. The largest is offered by First Fidelity Bank of New Jersey, with over 120 lines. Most major US hanks, however, offer a video banking nowever, other a video banking service. The largest of these is Covidea, a joint venture hetween Bank of America, Chemical Bank, Time Inc. and the telecommunicatious giant AT&T, with almost 50,000 sub-servibare

ched e aimilar operation last year, The only other UK bank to look at screen-based home banking seriously is Midland. In late 1983 it launched a home banking experiment, involving L300 subscribers, mainly in HOBS and Homelink in that it

was a private viewdata scheme, launched in 1984 it was not linked to Prestel Midland expected to gain over a million added further refinements to subscribers within three years, the original, but the project has but only 40,000 people signed on subsequently been put on the in the first two years, and the backburner and there are no system will be lucky to attract lans to extend it.

hank branches. However, Banco hank branches. However, Banco Nazionale de Lavoro has had some success with a telephone hased system called EVA which is limited to enquiries, ordering statements and authorising prearranged payments. Tha pattern that has merged in home hanking is that the first wave of screen hased custome

wave of screen-based systems have failed to excite the public imagination, although husiness users are seeing its advantages. Telephone-based systems may hold the key to the flure, but they have to overcome the resistance to home banking that currently evists currently exists.

Cash retains its grip

ELECTRONIC FUNDS transfer at the point-of-sale (eft-pos or cashless shopplog) remains one of the enduring dreams of the information society. The notion of paying for goods in shops and stores without cash. cheques or credit vouchers seems to hold so many advantures of hanks, retailers

advantages of banks, retailers and shoppers alike. It would mean an end to the mountain of account and crediting the other. paper which threatens to sub-merge the banks and credit card compaoies alike. It would compaoies alike. It would guarantee payment to retailers and speed their coonter service. And it would relleve the customer of the need to carry cash or cheque book in increasingly dangerous times. The dream, howaver, does not quite match the reality and eff-pos developments worldwide

as bankers and retailers arguing over who should pay for what and who stands to gato most from implementation of eft-pos

nnderlying eft-pos is simple and well proven. Instead of rash or cheques, the customer presents proof of his or ber identity, gen-erally in the form of a plastic card exartly similar to a cheque guarantee card at the point of

deripher the magnetic characters imprinted on to the card. The customer is then invited to

tap his or her personal iden-tification number (PIN) into a small keypad out of sight of the cashier and other customers.

If the PIN and the magnetic instription on the card agreegeoerally some form of encryp-tion or encoding is used to improve security—a telephone message is automatically generated and transmitted to the card issuer's data centre. The message asks for verification that the card is valid, does not appear on the hot list of lost or siolen cards, and that the amount of the transaction, which the rashier bas added before authorising transmission of the message, will not take the customer unacceptably into the

If all these conditions are met, the message will come back to

sums over several months. The situation in the UK is a microcosm of the difficulties in establishing eft-pos as a natio-nal payment system. Size, communications, num-ber of banks and rail outlets have been factors suggesting that the UK could be among the first to establish a cashless shopping system country-wide. Nevertheless, plans led by the banks to establish such a system have been delayed again and again. To some extent this was becanse planning was left to the technologists who were notor-lously shy of letting others, not-ably the retailers, in on their plans. fault-tolerant computers and Base 24 software. It will soon support 1,000 terminals and plans are in place to install np to 5.000.

In Hong Kong, the 29 major banks, lead by the Bank of Hong Kong, have a system called Easy Pay with some 270 terminals installed in 100 shops.

Although each of these pro-totype and experimental sys-tems (and those described rep-resent merely the tip of the cashless shopping leeberg) has some elements of an ideal eft-mes system not one of them is Nevertheless, in the past 18 months, the banks, with the sup-port of the Retail Consortium, agreed to go ahead with a full national service. A new, joint company. Eft-Pos, was estab-lished to mastermind the development pos system, not one of them is true to the model in every respect

In some, for example, the card development is validated, but transaction data is not captured. In others, both validation and data cap-

## **POSSIBLY THE BEST INVESTMENT A BANK COULD EVER MAKE.**

Don't just take our word for it. Ask some of the 500 or so banks who have already put their money on the Philips PTS 6000 terminal system,

To date, we have installed or received orders for over 110,000 workstations for bank branches throughout the world. Plus another 20,000 workstations from other Philips systems.

And to prove that you really get your money's worth with the PTS 6000, not one system has ever been taken out of service.

The PTS 6000 can deliver such a return on investment because it's an evolutionary system with a flexible architecture. In short, it grows as your needs grow.

It helps you adapt to today's changing market, so you can remain competitive tomorrow.

But the PTS 6000 is not only value for money, it's state-of-the-art . technology.

It has unique new software tools to ease the development and ; maintenance of applications.

And more of the kind of advanced hardware that has made it such a world success.

In fact, the more you look at it, the more you'll see why the PTS 6000 terminal system makes such a sound investment.

It's like putting money in the bank.

To find out why the PTS 6000 makes such a sound investment, return the exercon today. Cumpun Address 46 758 100 00. Telex: 115 05 Ph

## Race to supply new services

FOR A long time the most familiar symbol of electronic banking, automated teller machines (ATMs) beve spread across Europe to become e fea-ture of almost every main city Street

VI+

Street. In Britain, public reaction was not always so favourable— when the first ATMs were installed, 20 years ago, the machines were tediously slow and unreliable, and their usage

and unrematic, and their usage was low. Today, they are regarded by the banks as pioneering public initiation to more sophisticated and demanding forms of alec-tronic financial services, such as home banking, cash manage-ment and electronic funds transfer at the point of sale transfer at the point of sale (EFTPoS).

The growth of ATM networks has beeu so rapid over the last 10 years that the market is approaching ssturation point in terms of installetions. According to the highly respected Nilson Report on ATMs Worldwide, the down-ward trend has already started, with fewer machines installed the point where a rationalisa-

## Systems tailored to market-makers

THE UNHOLY trinity of information simultaneously to increased competition, dereg-ulation and technology is the principal driving force behind the financial services revoln-tion. Where the world's stock ried out by telephone.

tion. Where the world's stock markets are concerned, however, the paradox is that technology, while driving change by making possible new products and enhancing old ones, can also be harnessed to help with the effects of competi-tion and deregnistion. In 1971, however, the National Association of Securities Deal-ers Automated Quotations, or NASDAQ, system came into heing. This highly sophisti-ceted, computer-based com-munications network stores price information on some 4,700 companies. Through the system, all the OTC hroker/dealers are

**Information Technology in Finance 8** 

## Security a prime concern

SECURITY is one of the great concerns for financial institutions as technology begins to underpin all areas of the money business. Already, hanks have become tha most security-con-scious of all groups outside the military authorities, simply because of the awesome implications of abuse or failure in today's electronic banking

Betworks. Billions of pounds worth of transactions are now carried out daily over computer and communications networks. And, as such business is set to increase at a substantial rate, so the opportunity for ingenious forms of abuse also becomes greater

Revising financial systems' security at all levels has become a prime concern. Consultancies. such as Logica and Admiral Computing in the UK, have become specialists in this type

of risk analysis. Data security is a wide-ran-ging field which covers such matters as ensuring that a message bas reached its destina-tion, uncorrupted, verifying from whence tha data has come, to such areas as equipment protection.

Accidental or deliberate damage by fire, for example, may do as much harm as e fraudster trying to tap into the network to divert funds by alectronic

A system to give an indisputable record of verbal transactions for City dealers: Dictaphone Veritrac equipment in use (at right in background) in the dealing room at Lloyds Bank foreign exchange unit. There are around 300 communication recording systems in the City alone.

SAFEGUARDING THE NETWORKS

Research is being intensified into ways to make electronic financial systems secure from faults and ill-doers, as Elaine Williams reports here

Because most financial nei-works need to keep operating under all circumstances, a numsystems, have the effect of limiting the number of personnel who can tamper with a compuber of safety masures are taken—thesa include so-called "bot standby systems," where a ter system. Electronic forms of access control which identify the user can be programmed to duplicate computer and softbe linked to the main computer to verify that the person sited at a restricted or high security terminal is cleared to use the ware system can be switched on, if the main system fails. Such standby equipment is nsually located several miles away from system. the main computer network. A number of specialist companies offer companies this facility. Access control systems oper-Banks and insurance groups are large subscribers to such ser-

Access control systems oper-ate in a variety of ways-for example, one supplier, Time end Data Systems, has recently launched a system called the TS300. This piece of equipment is connected to the RS232 com-munications line which converwhere conventional security munications line which conven-tionally joins the various termiends and computer security begins is sometimes bard to detect. Conventional forms of security, such as access control

ahle. Tha microcard is a credit card-sized device which has an infra-red coding system, instead of tha usual magnetic stripe. Access control systems, espe-

can have extra security features built in to them, such as the need to insert a second card into a second terminal to allow the use of a restricted terminal. While organisations may feel reasonably confident about internal security, data can be vulnerable from outside sources, such as when information is being transmitted around network.

Technologists have come np with two major techniques to combat this threat-deta encryption and anthentication. In its simplest for, encryption is a way of scrambling a mes-sage before transmission. To people tapping into the network the information is e meaning-less jumble, since only a special here can decode the message

password. Encryption and authantica-tion are both measures to be considered in the light of an husiness husiness key can decode the message. organisation's husiness Encryption is ideal for data methods. In the banking world,

process, and this system is con-sidered to be even more secure than the singla key facility. Along with encryption, anthentication is another important data security tool. It is the means by which data being transmitted or received can be traced as it enters and leaves the network Cuph facility aometimes seen es the solution to tha growing demands for security in data transmission-particularly when tha transmit-ted data is between financial ted data is between financial institutions. The concept was first developed in 1975 by two electrical engineers at Stanford University—and, lika all the best ideas, is conceptually very simple. Two separate encryp-tion keys are necessary; one to encode the message and one to leaves the network. Such facili-ties are a safeguard against fraudsters who may be interested in entering information about fictitious transac-tions to divert funds from bank

encode the message, and one to deciper it. The encryption key becomes public knowledge (and hence the name of the method), and can be published in direc-tories: hut the associaed decryption key remains tha private knowledge of the decoder or recipient.

Thus, to send a message from A to B, the sender need merely look-up B's encryption key, encrypt tha message, and trans-mit it. From then on, only the decryption key will be abla to decipher the message—and since this is known only to B, the message is, to all intents and purposes, safe from intercep-tion and decipherment. But, while the concept is sim-ple, the implementation is diffi-cult—and, surprisingly enough, a world-lead in commercial pub-lic-key systems has been seized by a small UK company by the Thus, to send a message from by a small UK company by the name of Business Simulations with a product called FAP4 (fast arithmetic processor, version 4).

known as truncation. In this system cheques pald in Although several major banks elready use public-key cryp-tograpby, its wider nse is being bampered by the huge amount of processing required by the system. For sufficient security, encryption on 512-bit numbers is required (compare this to the more usual 16 or 32-bits proces-sing, used by standard personal computers). Thus, a single would take 45 seconds on a stan-dard PC-or 1 second on a mod-ified system full of expensive boards apd complex circuitres in this particular mar-the tat large compuler companies are taking an increasing increasing in the same increasing increasing is required (compare this to the interest in this particular mar-the paper finally transported, UK's market leader (although this could be contested by NCR, around 40 per cent). Network management equipment from Racal-Milgo. The system (CMS-385) can control and maintain the largest international data networks from one central point.

## How computers are cutting back the paper-chase

THE PAPERLESS office was long-predicted by purveyors of high technology. But the computer, that proposed harbinger of electronic messaging, proved to generate ever more paper — and often create still more problems thet could only be solved by huying another computer.

There is, bowever, ona area in which a drastic reduction in the movement and processing of paper is not merely desirable and possible, but positively necessary. It is in the trans-portation, processing and man-ipulation of the standard and uniquitous formal notification of a financiai transaction: the of a financial transaction: the cheque.

The mere statistics of cheque movement (many millions of cbeques circulating at any one methods simply unworkable.

The solution is to use compu-ter technology to solve the problem that computers have, to a large degree, exacerbated over the last decade.

The answer is computer-based cheque-reading, sorting, storing and data transmission devices. It is by no meens e small market. Such devices could be distributed in every one of all of the clearing banks'. regional branches, leading towards the banking approach, known as truncation.

over the counter at a hank hranch are retained at that hranch and not physically sent through the bank's clearing systems. It is a form of decen-tralisation --- and It mekes interesting speculation to won-der where decentralisation

DOCUMENT PROCESSING With the volume of cheques now in circulation,

there is a growing market for computerbased devices for cheque-reading, sorting and storing. Kevin Townsend looks at the latest developments.

Alcatel — and, perhaps more importantly, IBM in West Ger-many. Indeed, it is known that two years ago IBM commis-sioned a leading market resear-cher to investigate the entire document processing market: cbeques circulating at any one time, with a face valua of any-thing between one and millions of pounds), provide a phenomi-nal problem. But to complicate matters, it is a problem that becomes worse, rather than bet-ter. It is not merely that existing manual methods are costly and continuing rise In volumes threatens to make these methods simply unworkable.

 OK market for document-pro-cessing as residing solely in the banking world.
 However, the antomation of remlttance processing within public utilities, mail order houses and large commercial forms indicates the possibility of firms indicates the possibility of a much wider application and insurance companies, such as Britisb Reserve, have found it cost-effective to follow suit. It cost-enective to follow suit. The decision by a number of building societies to issue che-que accounts has made it in their interest not only to use cheque ancoders int also to investigate the use of reader-sorters

increasing within traditional banking activities, but also by these new operators in the financial services market.

Some of these feetures cannot easily be handled other than by traditional metbods. Some, given inter-bank agreement and changes in the law, could con-ceivably be handled more cost. effectively given the right technology at the right price. For more than 25 years, Burroughs bas now been producing desk-top encoders to meet the need for a system at bank brancb level in order to encode documents at the point of entry into the banking system. While the functions bave not changed, the solution has. Systems have become more compact; they have greater flexibility, ere easier to operate, and heve come down drastically in price

#### The SWIFT Network

## **Banking's unifying force**

SWIFT, the international elec-tronic message service for transmission represents about banks, is now going through a 30 per cent of the society's total major overall. The system is revenue. to full capacity and the Anisation is investing in new communications to speed assess faster around the world. It is the first major apprade since SWIFT, the Soci-ty for Worldwide Interban Telecom lectronic d nine years as

SWIFT has become a unifying force in the banking world. More than 1,400 banks are mem-bers. Each day about 750,000 messages fly across the network, which has the capacity to handle more than a million mea-

In many respects, SWIFT has become a unifying force in the banking world. It has forced banks to standardise their bank-ing procedures so that each ses the same format for similar services.

The organisation has built a new operating centre in the Netherlands and the existing U.O centre has been upgraded to cope with the new services. Coupled with that all the regio-nal centres around the world are the being upper and the world SWIFT II, as the improved etwork is called, has not been straightforward development. straightforward dev It has suffered some technics set-backs and is still undergoing testing and is likely to be at are now being prepared for the least six months late in 'goin live.' Mr Jacques Cerven onths late in 'going SWIFT has also invested in a

key parts of the software for the system were not ready, will now not make the rescheduled cutover date of March 1987, when the Society's 1,800 mem-hers were due to switch from the existing network, SWIFT I, to the upgraded system. Start-up time, says Bessel Kok, the general manager and chief executive officer, will be "somewhere around Fall, 1987," although he promises a more precise date next year "when the software will be handed over for acceptance." The ressons for the delay lie once again with the software, and the tricky problem of integrating the network architecture with the internal system software. flardware for SWIFT II is already being installed. stalled.

installed. "Work on integration testing has not gone as quickly as we expected," comments Peter Drummond, vice president of SWIFT, "and the results have not been as good as they need to be." He likens the dilemma to that of composing a figure-some of the pieces are not fit-ting peperly.

## MD 110. The exchange that guarantees the future.

Talking about the future has become very fashionable. Very fashionable and very easy. New products and new systems are tipped as systems of the future. But since only time will tell which claims are valid, our established track record as a telecommunications front-runner is, admittedly, a distinct advantage. For us, but also for your You see, with our new MD110 digi-

tal exchange (or PABX if you'd prefer to be technical) you can do lots of things with your telephone system you'd never have thought possible. Including data transmission and networking for example. As well as

making light work of all convention-DP

 I don't believe in crystal balls.

al exchange functions as well. Developing such an advanced

exchange has taken us a long time (110 years in fact) but then the MD110 is going to define the state of the art for a pretty long while. So why not find out more about what you should be expecting from your exchange, and about how Ericsson can help you, by clipping the coupon today or by phoning us.

Unless, of course, you have a crystal ball.

WHEN THE Dow Jones Iodex fell a record 86.61 points in one day last mooth tha fall was amplified by program trading. thot compare thot

Computer programs in trading bouses spot discrepancies between the price of a stock and its underlying value in the futures contracts on the Stan-dard & Poors 500 shares index. The program instructs the trader to sell the stock and buy trader to sell the stock and buy its futures contract, which, io a falling market, is worth less, in a risk-free arbitrage deal. This amplifies the fall of the stock and, as the program is set for the whole of the Standard & Poors 500, the whole market falls.

These programs cootain no artificial intelligeoce (Al). The technology exists for AI prog-rams that could spot such arbitrage possibilities in any futures contract on any exchange in the world, on the Financial Times-Stock Exchange 100 Share index, for example. And as the trade would probably be made in Chicago (tha ceotre for futures trading), the program would spot arbitrage possibili-ties on a falling curreocy.

ties on a falling curreccy. So, if there was a ruo on UK shares, an AI system in Chicago would apot the opportunity for a fast hnck aod amplify oot only the UK share slide, but also a run on starling

They ere, however, confideot of their own commer-cial judgment and the day when the technologists could have their way without a struggle has their way without a struggle has clearly gooe forever.

Q4.

4

The computer control centre at Lloyds Bank, London.

Who's the banker's flexible friend?

In today's Retail Banking environment, you need the flexibility to access information from more than one source.

Fortunately, Nixdorf has come up with the answer. We've developed a family of banking systems which are so complete, so compatible that there's only one word for it: Bankware.

Nixdorf's Bankware Service is a total banking system which automates the functions of any financial institution, from customer self service to management analysis.

The range of Nixdorf Bankware is unrivalled -- everything from external Automated Teller Machines, to in-branch cash dispensers, self service terminals, advanced

counsellor workstations and a vast array of peripherals.

All specially developed to meet the needs of financial institutions.

All integrated.

All compatible.

And all future-proof -- because modular components mean virtually limitless expansion, with no

scrapped software, and no obsolete hardware.

Sounds useful -- if only it attached to your mainframe?

Well, it does. Nixdorf Bankware works with all mainframes.

Which is what you'd expect, from a company renowned for bringing mainframe power to the workplace.

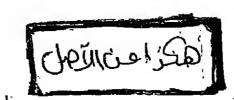

Nixdorf dedication to service, reliability and innovation has made us Europe's largest manufacturer of minicomputers, and the European leader in banking terminals.

So for computer power where it counts - at the place of work support your mainframe supplier: choose Nixdorf Bankware.

Nixdorf Computer Limited. Fountain Precinct, Balm Green. Sheffield S1 2.JA.

German reliability matched by British know-how

and (right) street flower seller in Amsterdam. Dutch labour market would help spur growth, but with ooly limited results. Wage demands have moderated and unit pro-duction costs have eased some-

home pay. The heavy social-security pre-miums, which are among the highest in the OECD, must fall along with taxes if employees are to have more incentive to work flexible hours. But that will be difficult as The Hague is gradually shifting more of the financial burdeo for the cradie-to-grave welfare system to the premioms and away from direct

premions and away from direct governmeot outlays. Much has beeo made of the cotbacks in welfare benefits hut payments actually will have been pared by only 7½ per cent by oext year compared with social-secority hurdeo, mean-while, has shpped only a bit from 55 per cent of NN1 three

have a lot to do with Dntch workers' aversion to overtime. For many employees, one extra guilder of iocome means 30 cents of take-home pay and 70 i cents of take-home pay and 70 i cents of take-home pay and 70 i cents in taxes and social-secur: higher incomes, a salary rise can actually meao less take-r home pay. families

A recent government commission recommended that family members and friends take a more active role in providing for the elderly because public floaoces already were stretched to the limit. But critics argued vehemeotly that many pensioo-ers could fail through the gaps

ers could fall through the gaps io the system if their care were left to private iodividuals. "These changes will call for extra resources," Queeo Beatrix cautioned in her speech. "Both in terms of finance and in terms of solidarity among people." Perhaps one of the most illustrative examples of the debate about the caretaker

that of broadcasting. The Dutch hroadcasting system is strictly non-commercial, tightly control-led by The Hague and organised along the lines of the "Zuilen," the political and religious divi-sions that dominate Dutch society. The Hague and many estab-

lished broadcasters are fighting strennously to keep commercial broadcasting out of the Nether-lands, cooteoding that the plurands, cooreoding that the pint-alistic "Zuileo" represented on the airwaves would be destroyed. But a few intrepid voices are arguing that commer-cial broadcasting would give more freedom to broadcasters and viewers alike and perhaps recapture some of the advertising revenue lost to foreign prog-rammes beamed into the Netherlands.

Paternalism dies hard in a country that has relied on central control for as long as the Netherlands. But more individual responsibility may be the only way to avoid a decline in the high standard of living.

Forecast of meagre expansion

LONG AN economic laggard of will be saved through spending national labour accord. Under after deductions. The combine western Europe, the Nether cuts in a hid to keep the budget the recent policy-setting accord, burden of taxes and social lands is suffering a fresh drag deficit at 8.1 per cent of net the government, employers and on its growth: low energy prices. national income (NND) next employees agreed to aim to As a major energy producer, the year. That would be only reduce the number of unem-Netherlands has been hit by slightly bigger than this year's played to 500,000 by the year. but little improvement is revenue fall-off. and government revenue from The business community expected next year when the grave welfare system that be business The

and government revenue from natural gas is plunging. The Central Plan Burean is claims this files in the face of the Lubbers government's pledge to create favourabla conpredicting that national inco growth will fall sharply from 24 ditions for industry. Steeper corporate taxes next year will more than offset tax breaks over per cent to 11/2 per cent next year, one of the slowest retes in more than onset tax breaks over the past four years, says the VNO employers association, tha largest such industry group. Mr de Korte, whose Liberal Party consistently backs busi-ness, insists that the Lubbers government remains commit-ted to industrial grouth and will the European Community. But many observers say the semi-independent plan burean is being too optimistic, with the Organisation for Economic Co-

Organisation for Economic Co-operatioo and Development (OECD) forecasting a meagre ¾ per cent expansion next year. The Hague is clawing back more than balf of its lost gas revenue through higher taxes next year, erasing part of the economic boost that could come from lower fuel costs. The busi-ness community in particular. ness community, in particular, complains that the Centre-Right government is reneging on its promise to foster tha private sector in nu effort to promote growth. Mr Rudolf de Korte, the new

Economics Minister and vice premier, vigorously defends the Christian Democrat J premier, vigorously defends the Christian Democrat-Liberal government's decision to raise taxes in an effort to keep the budget deficit under control. Formerly the Liberal Party's financial specialist in parlia-ment, Mr da Korte was appointed Economics Minister and vice premier last July when the second administration of Prime Minister Roud Lubbers began.

began. "The government was the big loser as a result of the energy price fall while the burgers and business have profited," Mr de Korte explained during a recent

Korte explained during a recent interview. The Hague's coffers are suffering, no doubt, Gas revenue, which now accounts for 14 per cent of all state income, will plummet by more than half next year to 7.2 per cent. But whether business and burgers will profit is less clear, Expansion in industrial produc-tion will hardly accelerate next wear, edging up only to 2% per tion will hardly accelerate next year, edging up only to 244 per cent from 2 per cent this year and last. The rise in business investment will drap by half to 4½ per cent in 1987 from this year. And consumer spending growth will decline to 2½ per cent next year from 3 per cent this year.

The 1987 bodget is the tough-est in three years, with taxes rising for the first time since 1984 and government outlays actually failing for the first time

burden of taxes and social security premiums has edged years but there seems to be lit-

expected next year when the jobless rate is forecast to fall community only to 670,000, or 13.8 per cent, from 696,000, or 14.3 per cent, now. A plethors of reasons have how A pictuota di leasona nave been clied over the years for the Netherlands' stubborn un-employment problem: high wages, narrow wage differ-ences, bureaucratic dismissat procedures norocedures and generons to the minimum wage are among the foremost.

ted to industrial growth and will lower taxes again when oil recovers to F1 60 (\$26) a barrel. A mushrooming problem is a mismatch between labour skills and nyailable work, with many "Our policy is firm: less govern-ment and more private sector." In defence of its 1987 bndget, The Hagua is quick to point ont that it expects disposable incomes to climb 3 per cent next wear continuing the basilby of the job openings requiring better skills and education than what is available among many employed as well as unemployed. Black mark help keep the official jobless

year, continning the bealthy recovery of this year. But half of Still anothe

## Seeking alternatives to gas and oil

Energy

AFTER 25 YEARS of dapend-ence on gas and oil for the balk of its energy needs the Nether-lands is beginning to think seriously abont alternatives. It is true that tha Soviet nuc-lear — and it leads to air poliu-tions plans to increase tha con-tribution of nuclear power and may mean n greater role for coal. Bnt tha Dutch are seeking to reduce the relative contribu-tion of gas and oil. The country's extensive gas reserves will continue to meet expected demand until well

to reduce the relative contribu-tion of gas and oil. The country's extensive gas reserves will continue to meet expected demand until well into the next century. But after more than a decade of dabate nbout nuclear energy tha gov-ernment had declared liself willing to bring more nuclear power stations in to use. This was despite tha outcome of a nationwide opinion-sound-ing exercise — carried out before the Soviet disaster — which showed that most of the population was against the immediate construction of new nuclear power stations.

immediate construction of new nuclear power stations. The spread of radioactivity from tha Soviet plant nt Cher-nobyl has forced the govern-ment to delay the nuclear prog-ramme — possibly for several years — until the results of an official report are ready and further discussion has taken place. The

## Pushed to the forefront

WIM KOK, leader since July of the Dutch Labour Party, bas one of those splendidly straightforward Dutch names which seem to express the directness and lack of pretensions of the national character. The man lives up to the image.

A tall, loose-limbed figure, be approaches the challenge of wresting power from the pre-sent Centre Right government of Prime Minister Ruud Lubbers with the same pragmatism that took him to the top of the Dutch trade nuicon movement The cent trade nnion movement. The con-trast with the fiery and empas-sioned style of his predecessor, Mr Joop den Uyl, cmild not be more striking.

trading company to a research job with the construction nninn in the early 1960s, Mr Knk said

my days phinning round to find the cheapest tins of green beans in Holland which could be sold for the bighest price in Asia. I didn't move to the uninn nnt of a passinn fur the principles nf socialism. I was bored stiff with green beans; the union was all about people."

Of Mr Kok's effectiveness as a nnion leader there can be no douht. Appointed the ynungest chairman of the Socialist Union Federation (NVV) at the age of 35 in 1973, be headed the merged Netberlands Trade Uninn Federation (FNV) throughout a turbulent decade nntil he stepped dnwn in September 1985.

No serious challenge to his Indership emerged during those years, which saw the two oil "sbocks" and the growing realisation that the cnuntry's generous welfare system con-structed in the 1960s and early 1970s whild have to be trimmed. Despite several years of cut-backs the Dutch still enjoy a standard of living to be envied.

still suffers from a vague image For all his long experience of nninn affeirs Mr Kok came in over just what they stand fur. The small parties on the far politics as a newcomer at the age of 47. He might have Right and far Left have sporexpected several years nn the back benches to learn the ropes, adically discussed mergers over the years hut seemed to have but Labour's failure to gain a share of government power in last May's elections led to the resignation of Mr Den Uyl after more than 20 years. gained no mnmentum since the damaging elections. Three parties remain on the far Left and five on the far Right but they

Mr Kok was thrust, after only a few months, inth the role of party leader. His maiden speech in Parliament formed the Labour party's response to the policy statement with which

from Rotterdam

An avid reader during his schooldays, the young Knk developed a particular enthu-

siasm for the naturalistic novels

of the 19th century French wri-ter Emile Znia. Reading npened

a wider world beynnd the quiet village nn the polder.

His early views were also

perhaps surprising that he opted to go to the Nijenrode business school near Amster-

dam. He explains the paradox,

saving that the subjects at

Wim Kok: sober approach

Nijenrode, particularly the emphasis on foreign languages, appeared to him to provide a passport to the nutside world.

His early ambition was to come e foreign correspoodent in Paris nr London. But after completing bis studies and his notigatory military service he weot to the trading company ment outlined its policies for its in Amsterdam and the business second term. It is no small tribute to the nf green heans.

Despite the economic uncer-tainties created by the two sharp nil price increases in the 1970s and pressure from some of the more extreme uninn mem-bers for unnfficial trade union prominent party figures such as Mr André van der Loow, a for-mer major of Rotterdam. Action, Mr Kok upbeld the mod-erate tradition of unionism io the Netherlands. At the same the Netherlands. At the same time he maintained a high standard of tiving for most of his members.

He lists two significant chievements in bis 12 years at the head of the union movement. They are the merger between the socielist NVV and Catholic NKV union federations in the mid-1970s and agreements reached in 1982 with the employers over a redistribution of work to help comhat

His early views were also strongly formed by the political views of his father, wbn was treasurer of the local section of the building workers' uninn and e committee member of the Labour Party. From these Sncialist roots it is traditinnalists.

" It is not that the unions are moderate," Mr Kok says. " It is the Dutch as a whole who are moderate. It is not in the natio-nal character to rush into conflict. Strikes only happen after negotiation has been negotiation exhansted."

The problems of the Labour Party will be no more amenable to solution than were those of the union federation.

The three main issues the party currently bas to face are nuclear power. Cruise missiles and the econnmy. Labour is against the expansion of the Netherlands' small nuclear generating capacity, continues to oppose the siting of Cruise missiles oo Dutch soil and wants to maintain the generous welfare system which is now under ettack by the government.

The question facing Labour is wbether the sober epproach nf Mr Knk can find greater support among the electorate than the more committed style of his predecessor.

**Charles Batchelor** 

The never-ending search for the perfect bearing.

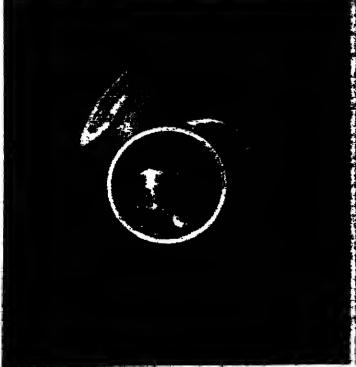

No doubt the computer has made office life run more smoothly. But have you considered the levels of precision required to provide such efficiency? Take the actuator, which has a seemingly simple task in the magnetic disc drive. By accepting a signal it moves the head to the specified track and reports back when the head is ready to read or write. Fine adjustments, measured down to millionths of an inch, can literally make the difference between unreliability and excellence. The same accuracy is essential for the bearings. Consider the sophisticated Winchester disc drive - a model which both improved access time and, with a track density of over 1,000 tracks per inch, more than tripled the storage capacity. SKF's brief was quite simply to create nearperfection - a spindle bearing unit rotating so accurately that no read/write errors would occur from unwanted disc movement. The success of the venture can be judged by a current aim - to double track density levels to 2,000 tpi, for which bearings of even greater precision are needed. At SKF our search for perfection will go on for ever.

ш

reputation Mr Kok built up in his onion years that his party was willing to push him to the fore, despite the shortness of his political experience. and micro-precision scrutiny.

#### Down to the micro-world of the bearing

Our search for new answers takes us deep into the micro-universe of the bearing-where micro-changes of a 10,000th of a millimetre are now common-place. And new bearing designs can yield energy savings of up to 80%.

For this, high standards of metal-working precision are required - and 'near-absolute' accuracy bas to be maintained from steel purity through computerised design to application.

Now, by harmonising new theory with the reality of new technologies we have shown how bearing life-and reliability-can be prolonged nigh on indefinitely.

75 years of close customer co-operation has given us the expertise to create a virtually boundless programme of ball, cylindrical, taper and spherical roller bearing types in some 25,000 variants. From miniatures weighing three hundredths of a gramme to giants weighing 500 million times more. Assuring our customers worldwide of the exact bearing for every application. And ultimate reliability.

Like an effective actuator, at SKF we're usually on the right track.

## SKF. The exact bearing.

"THE LIMITS of growth have agricultural trade surpluses of been reached in fact, they have about F1 15bn to F1 16bn in already been exceeded recent years, despite importing ....There are no simple solu-tions to the problems of Euro-pean agriculture we have a number of difficult years ahead," Mr Harm Schelhass, family family farms with the fleetibilty

60,000 dairy farmers had to pay the EEC superlevy for overpro-ducing in 1964-85, the first year in which these curbs applied. They had to pay 56 cents a litre out of the 75 cents they normally received from the dairy. The total superlevy payment by Dutch farmers in that year was F1 125m (£38m), an average of F1 4,270 per farmer. This rose to an estimated F1 130m in 1965-36.

ury tart

agricultural products. Ninety per ceut of farms are family-run, a far higher precen-tage than elsewhere in the EEC. The average farm size is 15 hec-tares, below the EEC uverage of 17.5 bectares (excluding Greece). Tha average farm size in tha UK is 69 hectares. The agricultural and hor-ticultural sectors are grouped in an organisation known as the Landbouwschap or industrial at. Some farmers went ou pro-ducing too much and paying the superlevy because it was still worth their while. They could produce the extra milk at a marginal cost so they still made a profit despite tha levy. But for a small number of far-mers already in financial prob-lems the levy was enough to push them over the edge into bankruptey. 86. Landbouwschap or industrial board for agriculture. This board represents both

board for agriculture. This board represents both employers and unions in the far-ming and food processing sec-tors and lohhies the government for their interests. The livestock sector, in particular milk and dairy pro-duction, is the most important. Nearly two-thirds of the land under cultivation is under grass, and animal products account for nearly 70 per cent of all agricultural output by value. push them over the cage into bankruptcy. Dutch pig and pouliry farmers also bave their prohlems. The country's 11.1m pigs, 45m laying hons and 34m broilers are pro-ducing too much manure. As a small country with a very intensmall country with a very inten-sive system of agriculture, the Netherlands has a particular difficulty. But producers else-where, including those in the UK, are coming to realise they have a similar prohlem. Pig and poultry farms produce 86m tonnes of manure annually. This contains a utmber of harm-ful metals and chemicals such as copper, sinc, phosphates and

account for nearly 70 per cent of all agricultural output by value. The Dutch livestock herd com-prises 5.5m cattle, including 2.5m milking cows producing about 13m tonnes of milk annually. The Netherlands is the world's largest exporter of cheese, accounting for 20 per cent of all world trade. It is also number one in trade terms in condensed milk (46 per cent). The dominance of the dairy sector means that the issues raised by the EEC milk surplus tonnea. Difference raised by the EEC milk s

Production curbs affect not only investment in these sectors. In the farmers but reverberate investment in these sectors. In the farmers but reverberate investment in these sectors. In the farmers industry, the animal feed pro-ducers and the suppliers of dairy equipment. Nevertheless, Mr Gerrit three years. They also plan a Braks, the Agriculture Minister, and himself the son of a farmers, and himself the son of a farmers, concedes: "Production in the agricultural sector is rising so fast that we have no alternative scale of levies on the farmers to the reduction of surpluses." The Dutch are particularly working to the reduction of surpluses." The Dutch are particularly working to the sector is rising so for farmers, fragmenting the lower bouse of Parliament and uwaits approval by the upper chamber. With two of thair ean market.

uwaits approval by the upper chamber. With two of thair largest farm sectors affected by levies or the prospect of levies, where do the Dutch see further agricultural growth coming from? Mr Braks is in favour of temporary social programmes to help sectors in difficulty but is against long-term aid prog-rammes which take no account of farmers' income

The Dutch have agreed to reduce milk production in the 1998-87 EEC farm year (running from April to March) to a level levies or changing production methods by yet further increases in efficiency. 9.55 per cent below that of 1983. This represents a slight increase on the cuts called for the year before.

**Charles Batchelor** 

After the morning mail has arrived, most Dutch businessmen look alike: they'li be reading 'Het Financiesie Degblad', the Dutch business daily.

it's the one paper they cannot afford to miss for the latest conomic, financial and political developments.

The Financial Times European Businessman Readership Survey 1986 shows you the high readership of Het Financies Degblad.

#### Trade unions

## **Concern at decline in membership**

THE NETRERLANDS trade missis have come through a dif-ficult five years. The economic recember, record levels of memployment and the policies of a Getermined Right-of-centre Government have not made life

The Notherlands Trade Union Federation (FNV), the country's largest union organisation, has lost 173,000 members since its peak strength of 1.1m was reached in 1960. The Christian Trode Union (CNV) has lost 42,000 members and now totals about 350,000. Part but by no means all, of these bases have been made up by the growth of the Union of Middle-ranking and Senior Statts (MHP) which has taken

e members from hoth larger The rate of decline in union

the economy sharts to recover, but Mr Hans Pent, who bok over the chairmanship of the

FNV from the energetic Mr Wim Kok in September 1985, remains concerned about the future of

"Our higgest worry is the low level of membership among young people," he says. "It's more difficult to persuade peo-ple to join a union. We find it a short-sighted attitude but peo-ple have less money to spend and they save on their onion subscription."

subscription This decline in membership has forced the FNV, which func-tions as a central coordinating body for 16 Individual unions to The low Dutch figure may shed more than a quarter of its help to explain the relatively 370-strong staff. This has meact it has had to has prevailed since the war.

370-strong staff. This has menot it has had to trim its efforts in fields such as social welfare and health care and concentrate on its primary task of defending its members' jobs and earnings.

ons and earnings. A recent report, entitled "The FNV in 14 years" time," carried out by a special project group, recommended that greater attention be paid to the needs of the young, white-collar workers, women, part-timers and the indicas

The CNV, for its part, is con-cerned that politicians have stopped listening is the smions' views on social and economic matters.

"The union approached the Government and Paritament on many recent occasions to little effect. Courseous and responsible proposals were not given a hearing," it declared in its policy document for the years to 1990.

#### Hans Pent: still a major task ahead.

It also fears that the import-ance of organisations such as the Labour Foundation, where the two sides of industry meet to discuss wages and conditions, The two main central organisa-tions, the FNV and the CNV, have a powerful coordinating role in the affairs of the indi-vidual unions which are affilithe two sides of industry meet to discuss wages and conditions, and the Social Beomonie Coun-cil, a government advisory body on which unions, employers and ated to them. The CNV, for example, repre-sent 13 individual unions, ran-ging from the Catholic union for

Crown nominees sit, has been downgraded. down sectors with its 75 members up to the government and health Only just over a quarter of the Dutch workforce belongs to a union. This compares with figures of 48 per cent in the UK. 36 per cent in West. Germany and 59 per cent in Belgium. service union with 88,000 mem-bers and the industrial and agricultural union with 55,000.

Germany, hwerer, with a higher in the event the CNV feit its degree of union organisation, views would not be fairly repre-has also enjoyed good labour sented and the socialists and relations, while the UK with its most of the Catholic unions even higher figure has done less merged to form the FNV. Treil

Many white collar workers felt that they were not ade-quately represented by the large industrial unions which dominated the FNV so they set up their own body, the MHP. There are no plans to attempt again to form one organization. Mr Gerrit Turpetra, a CNV official, attributes the low level at simputes to the high degree of organization of hijs antons. This alterne disputes to go from plant to regional to actional level and back down again, increasing the channes of a solution being found action the chain.

The Netherlands lost only 20 whiting days for every 1,000 employees in the period 1974-53, compared with 30 days in Ser-rates, 216 days in Belgium and 486 days in the UK, according to UK Department of Employment than its larger rival, the FNV. The programmes of the two organisations are not dissimilar but the CNV's Mr Terpstra defines the difference between the two thus:

the Matherlands. "We believe in the individual responsibility of the worker for

Broadcasting

his workplace, his school, his family. We believe there is a layer of organisation between the state and the individual. The FNV is for more central government control of people's lives. We say the government is

already too powerful." In concrete terms this means the CNV favours more areas of life, such as wage negotiations and the social security oetwork, being left to the two sides of industry without constant state

The main theme of wage negotiations in recent years has been the length of the working week. This was cut in most sec-tors from 40 to 38 hours in 1983, and a further reduction to 36 hours is currently under discussion

The reduction in working hours has been financed by a freeze on the payment of comsation for price increases Dutch workers had become sed to automatic twice-yearly increases in wages to match Inflation.

The savings that have been made are being used partly to improve company profits and partly to increase job vacancies. The CNV believes aboot 140,000 jobs have been created as a result of the cut in the working week but the FNV is oot so sure. Not all employees, let alone employers, are convinced of the benofits of cuts in working time. The federation of senior staffs at one Dutch company said communications within the organisation had worsened and Ambitious plans for the crea-

tion of one central union organisation failed in the mid-1970s. The Protestant CNV was ome jobs had been farmed out to outside companies or moved to have merged with the Catho-he NKV and the Socialist NVV. hard The staff members affected

had to work harder and the quality of goods and services had declined, the federation said, and it took longer to develop and manufacture pro-

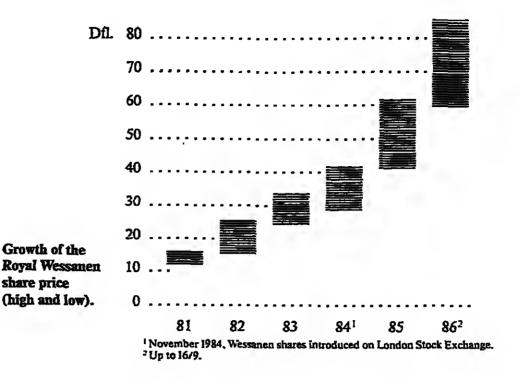

Mr Pont, 48, is a former land surveyor and was vice-chairman of the 243,000-strong eivil servants union, the largest FNV-affiliated union.

There are no plans to stiempt again to form one organisation. It is predecensor but, he more moderate line in its will open doors for his sue-than its larger rival, the FWV.

There is still a major task ahead, Despite signs that the Dutch economy is starting to pick up agaio there remain major problems of unemployment and the redistribution of wages and work to be solved.

**Charles Batchelor** 

## Royal Wessanen: a high performer from the low countries

A Dfl. 4,000 million annual turnover puts Royal Wessanen in the big league of world food producers. But Wessanen has no intention of resting on its laurels. Figures for the first six months of 1986 show continued profit growth. Net income went up 12% to Dfl. 28.2 million. The interim dividend was increased from Dfl. 0.55 to Dfl. 0.64 per ordinary share.

Group operations are divided 34/66 between the U.S.A. and the rest of the world; the aim is to achieve an equal balance. Wessanen serves a world-wide market. Group products range from edible oils and fats

products and animal feeds. Wessanen policy lays heavy emphasis on quality, innovation, added-value products and risk-spreading, geographically and by diversification.

Ine London Branch of Rabobank Nederland provides a personal service to companies with trade relations in both countries, the United Kingdom and the Netherlands. The office offers a complete range of international banking services.

Kabobank is a Dutch cooperative banking institution with total assets exceeding 130 billion Dutch guilders. It ranks among the largest banks in the world. Rabobank derives its strength mainly from its dominant position in the Netherlands, especially in Dutch agriculture and agribusiness.

Kabobank offers international financial expertise through its foreign based offices as well as through an extensive correspondent banking network.

Member of the Unico Banking Group.

Rembrandt country is Rabobank country. The country where traditions of excellence continue to flourish.

Parcels being sorted at XP Express at Maastricht Airport. The Netherlands is capitalising on its past as a world trading force.

DESPITE BEING one of the nents, data systems, ventce smaller European countries, the Netherlands can claim to be the region's leading transport and distribution centre. Its distribution centre. Its distribution facilities include, for example, the world'a largest port. Rotterdam, and Europe's fourth largest air-port in the southero Nether-handled, Amsterdam Schipbol. More recently, Maastricht Air-port in the southero Nether-lands bas sprung to prominence as a Continental hob for express freight service oparators Emery Worldwide and XP Express Par-cel Systems, and the European trucking operations of Britisb Airways. The Netherlanda has been a major trading force worldwide for centuries, a role which developed because of the coun-try's own relatively amall home market and lack of natural resources. Coal mining, a relatively recent development, cassed in tha mid-1960s while the now vast natural gas reserves are finite. To compensate for those sbortomlags, the Dutch bave effect turoed trading and distribution activities into a natural resource in their own right. Trading and transport in fact now account for over 30 per cent of the GNP and ween com-suited with related services, for well over half. Typifying the way the Dutch bave developed their distribu-tion role is the creation of a system of bonded warebouses which in effect makes the whole county a free zona. Goods can be stored in these

r gurea for 1965 show that of the port's total throughput of about 250m tonnes, some 206m tonnes comprised bulk cargoes such as oil, ores and coal, while general

Much of Rotterdam's success as s port has atemmed from its geographical position, which makes it particularly well-placed to serve a binterland which includes the major industrial areas of the Nether-lands, the Ruhr, Belgium and much of France. It has been estimated that the population living within a radius of 500 kilometres from Rotterdam totals some 150m and within 1,000 kilometres there are around 300m. That compares with the catchment area population of the world's next two largest ports, New

#### NOT IN INTERNATIONAL BANKING

The Dutch have a worklwide reputation. For being good, astute husinessmen. We're proud of this. But we also know that it's just not enough. Not in the world of international hanking which grows daily more complex and sophisticated.

Today, AMRO has an international hanking capability precisely tuned to institutional, commercial and corporate needs. Indeed, we are built around them.

Why not get in touch and test our competitive edge. We've got all of the Dutch business virtues as well.

# for a real Dutch treat?

Up till now the adjective "Dutch" did not have a particularly favourable meaning in the English language. When it comes to investing, this popular misconception needs some adjustment. The hard Dutch guilder, the favourable economic prospects and the absence of financial restrictions make The Netherlands a most attractive country to foreign investors.

If these facts prompt you to a course of action, a wise move would be to get in touch with Staal Bankiers. As an investment bank, with all our specialists under one roof at our single headquarters establishment, we are better able than most to advise you on all aspects of investing in The Netherlands. Promptly and efficiently, without the bureaucratic procedures all too frequently associated with banking.

During the last five years we have been the fastest – growing bank this side of the North Sea. It shows in our results. And it shows in our quotation on the Amsterdam Stock Exchange – since October 9, 1986. Which means that you can now invest <u>in</u> us as well as <u>through</u> us. How's that for double Dutch?

For all information, contact Mr. Emile J.L. Bakker, phone + 31 70 10 15 10. Our address is Staal Bankiers NV, Lange Houtstraat 8, P.O. Box 327, 2501 CH The Hague. The Netherlands.
